Press Release

HEALTHTEC SOFTWARE CELEBRATES 6 YEARS OF HELPING THE MEDICAL AND DENTAL PROFESSIONS

(San Antonio, TX) – HealthTec Software, Inc. (www.healthtec-software.com), a leading provider of medical (FoxMed™) and dental (FoxDent™) practice management software systems celebrates 6 years in business assisting medical and dental doctors effectively and efficiently manage their practices.

The software was originally developed with the help of now company president, Vance Nelson, in the late 1980's and has undergone over forty revisions to keep up with technology and more importantly, to offer continued benefits and value to the healthcare community.

Despite the economic strain many companies have experienced during the last five years, HealthTec Software has consistently grown their sales and service to their customers with software designed by, as president Vance Nelson says, "listening to our customers". Seminars and training classes by HealthTec are followed up with questionnaires to find out what customers would like to see added or changed in the software products and service offerings. "It's been through customer suggestions and requests that some of the most innovative ideas have been developed. We don't tell the customer what they need, we ask them what they want", Mr. Nelson added.

Since the inception of HealthTec Software on July 1, 1999, there has been a growing concern that physicians and their staff need to better utilize their practice management software to, among other things, help recover every dollar due to the practice. To help physicians with that task, HealthTec has expanded beyond providing software to taking on projects such as sponsoring "Technology Luncheons" with guest speakers from the Texas Medical Society, the Bexar County Medical Society and others to expose Practices and Doctors to advances in technology. The information presented at these seminars is designed to expose the physicians to technology

solutions that can help increase efficiency and improve quality of care. In addition, HealthTec is involved with helping identify breach of contract between practices and insurance carriers, a relatively new service offering.

HealthTec Software is now poised to release its latest versions of both FoxMed™ and FoxDent™ in the 3rd quarter of this year. These new versions will introduce many new time and cost saving features and will offer more integrations with additional collaborative products.

About HealthTec Software

HealthTec Software, Inc. is a leading supplier of complete, reasonably priced practice management systems for medical and dental practices. FoxMed™ and FoxDent™ offer easy to use, yet sophisticated features such as financial analysis and claims tracking, seamless electronic claims solutions, complete patient and resource scheduling, and efficient transaction posting.
